

# SNOW PUSHERS

**ALL UNITS SHIP  
FULLY ASSEMBLED**

**NEW  
STEEL**

**TRIP  
EDGE  
System**

Our back drag pusher lets an operator "pull" snow away from loading docks, doors, fire hydrants and other tight spaces that traditionally has to be cleared with a truck plow, or even a shovel, by pulling snow our pusher becomes even more versatile than ever on a job site.

**Proudly Made in USA**

**NEW**

Our steel edge pushers are excellent at removing hard pack snow and ice. Heavily used parking lots are ideal for the steel edge snow pusher to be put to task. The ability to easily remove hard pack snow and ice can also result in savings of time and money by reducing the need to apply sand, salt and chemicals.
